PIKE COUNTY, OHIO, WEDNESDAY, FEBRUARY 17, 1954

NUMBER 5

## GAT NOW OPERATING NEW AUTOMATIC PHONE SYSTEM

### Form Managers Club At Portsmouth; GAT Employees Take Part

Employees of GAT will participate in the Managers Club of Portsmouth which was formed this month.

Three GAT employees were members of the initial committees appointed to help form the organization.

They were Lloyd E. Fuller, nominating committee, H. H. Stoops, Jr., membership committee, and Lou Hochberg, entertainment committee.

The club is composed of Portsmouth business owners and managers of large business concerns. Membership is also invited from cities and towns outside of Scioto County. All contractors at the plantsite are participating in the program. Contractor membership includes superintendents and managers of departments.

The club, which will meet once a month, held its first meeting February 16, to vote on the election of officers and directors. Club members voted on the by-laws and the constitution.

### Evelyn Tingler Is Member Of Trio That Wins March Of Dimes Talent Contest

An employee of Goodyear Atomic Corporation is one of a trio that won first place in a March of Dimes contest held recently in Portsmouth.

She is Evelyn Tingler who is employed in the industrial relations division. The trio of which Evelyn is a member were known as the Melodyettes.

The talent contest was held at Portsmouth radio station WNXT with each vote costing one dime. All proceeds were turned over to the March of Dimes.

In the first round of competition the Melodyettes won by receiving votes amounting to \$65.50. In the finals, they accumulated votes totaling \$177.10.

In the first round of competition the girls were given a clock radio; by winning the finals they received \$100.00. The other two girls in the trio are: Bonnie Bartee and Naomi Craft.

### REPORTERS DISCUSS CLAN STORIES

WINGFOOT CLAN REPORTERS. Shown discussing a story are The Wingfoot Clan reporters (left to right standing) Vince DeVito, Phil Bates, Steve George, Ruth Carter, Genevieve Gundlah, Leona Gilliland, A. S. Ostroski, Al Forslund, Paul Benner, and D. L. Wells. Seated are Dick Hyland, left, Helen Lewis, Bernice Humphries, Mary Frances Swick, and Gloria Rhodes. Bill Poor and Dave Zelinski were absent when this photograph was taken.

### Reporters Assigned To Gather Departmental News For Clan

The Wingfoot Clan, Atomic Edition, now has departmental reporters to help in gathering news.

The following have been named as reporters for their respective departments:

Paul H. Benner, purchasing; Philip K. Bates, Jr., production administration; Ruth Carter, information and records; Mary Frances Swick, personnel services; Genevieve Gundlah, development engineering; Helen A. Lewis, dispensary.

Leona Gilliland, engineering control; Bernice Humphries, power & utilities; Ambrose Ostroski, laboratory; David Zelinski, cascade; D. L. Wells, process maintenance.

S. V. George, shops maintenance; Vincent J. DeVito, development engineering; Gloria Rhodes, stores; Bill Poor, process maintenance; Dick Hyland, training; E. E. Forslund, plant engineering.

The above group has been named to assure more representative news

from the various departments within the organization.

If you have leads for a news story or an article for publication in the *Clan*, please get in touch with the reporter who represents your department.

At a meeting held last month, *Clan* policies and an outline of possible story material were explained to the new reporters by the *Clan* staff.

### French Suffers Head Cut In Car Accident

Clyde French, of Goodyear Atomic Corporation's industrial relations division, suffered a bad cut on his forehead in a recent two car accident on Route 23.

French was given first aid at the scene and treated at GAT's dispensary. Dr. R. M. Andre, assisted by Nurse Helen Lewis, repaired the injury with six stitches.

The car accident occurred about five miles south of Chillicothe during the sudden snow storm that morning.

French was a passenger in the car driven by Don Barkett, also of the industrial relations division of Goodyear Atomic.

The Barkett car, a two-week-old sport model, was hit by a northbound car that skidded on the slippery highway into the southbound lane. Considerable damage was done to Barkett's car.

### Hogan Praises Employees For Proper Badge Display

Employees of Goodyear Atomic Corporation received a word of praise recently from Goodyear Atomic's plant protection department for the proper display of identification badges.

The compliment came from John E. Hogan, superintendent of plant protection, who said that most employees are wearing their identification badges properly.

"This is an indication," he pointed out, "that employees of Goodyear Atomic Corporation are security conscious and are aware of the importance of wearing their badges within the designated area of their clothing."

The badge is worn with the photograph side out, above the waist line, high on the left side of the outer garment.

(Continued on page 2.)

### Goodyear Atomic Has Good Safety Record

Goodyear Atomic Corporation had an impressive safety record in 1953.

GAT employees worked a total of 853,160 hours with only one lost time accident.

The safety department said GAT's frequency rate was 1.17 and the severity rate was 0.01. Frequency rate is determined by the number of lost time accidents multiplied by one million and divided by the number of man hours worked. Severity is the number of work days lost due to a lost time accident multiplied by one thousand and divided by the number of hours worked.

This is an extremely good record and it should be a challenge to us in 1954.

### 24,863 Calls Made During First Full Day Switchboard In Use

Goodyear Atomic is now operating the telephone system at the Portsmouth Area Atomic Energy Plant.

The new switchboard, located in the 540 Building on plantsite, has 1200 lines.

The new PABX system—private automatic branch exchange—is all automatic.

The first day of the change-over saw a great amount of pressure applied to the new system. There were 24,113 local calls and 759 long distance calls the first full day of operation. The peak was reached between the hours of 8 a. m. and 9 a. m. on Monday when 3,713 calls were recorded.

### Nine Positions On Board

The new board has nine positions. In addition there are two information positions. A position consist of the number of lines an operator controls.

As construction reaches its peak, manual telephones will be added to meet the expansion. After the completion of the project, the manual telephone system will be removed and all telephone service will revert to the dial system that went into effect the end of last month. The telephone system was converted at 6:30 p. m. Friday, January 29.

W. G. Farmer, supervisor of office services, said the equipment belongs to the General Telephone Company of Ohio. The maintenance, repair and upkeep of the new system will be handled by General's maintenance crew under the supervision of Peter Kiewit Sons' Co.

### Several Long Distance Lines

In addition to the 1200 intra-plant lines, there are 25 long distance lines to Waverly, two to Portsmouth, one to Cincinnati, one to Oak Ridge, three local lines to Piketon, and an additional three local lines to Waverly which are dialed. There are twenty other recording trunks for long distance calls.

The telephone system, which comes under the jurisdiction of H. H. Kenny, manager of the finance division, is one of the most modern in this area.

### GAT Trains Operators

Goodyear Atomic trained its own operators during the weeks prior to taking over the new system. Chief operator is Norma Copen. Male op-

(Continued on page 2.)

## GOODYEAR ATOMIC CORPORATION OPERATES NEW AUTOMATIC DIAL TELEPHONE EQUIPMENT

GOODYEAR TAKES OVER PHONE SYSTEM. Goodyear Atomic employees are shown as they handle the new switchboard on plantsite. In the foreground left to right are Alice Buyers, Paul Raulings, Opal Stonnell, Roscoe Days, Mary Wolfe, Joe Talkington, Grace Graves, Carol Johnson, and Kathleen Matheson. Shown talking to W. G. Farmer, supervisor of office services, who has charge of the telephone system, are Chief Operator Norma Copen, and operator Clotine Meyers. Above right are executives of the firms involved in the change-

over from manual to the dial telephone system. Left to right they are George Holling, general manager of Peter Kiewit Sons' Co., H. H. Kenny, manager of the finance division of Goodyear Atomic Corporation, A. J. Gracia, general manager of Goodyear Atomic, Kenneth A. Dunbar, manager of the Portsmouth Area project, and Clare Williams, president of the General Telephone Company.

### GAT Wives Use Valentine Motif At February Meeting In Chillicothe; Gavel Given To Club

A Valentine motif was used at the February meeting of the Goodyear Women's Club at the Warner Hotel. Mrs. Nathan Hunt, president, thanked the committee, Mrs. William Brown, Mrs. Anthony Hitchcock and Mrs. Frederick Irwin for arranging this attractive party.

Each member present was asked to introduce herself and say where she was from. For the first time, members responded with "Chillicothe", "Waverly", "Lake White", etc. as their home rather than their former residences. Each member was urged to invite those Goodyear ladies who have not yet attended a meeting to the March 3 meeting which will be at 7:30 p. m. at the Warner Hotel. Mr. A. J. Gracia, general manager of Goodyear Atomic, will speak to the group. Bridge and canasta will be played later.

Mr. Steven George was thanked for making and presenting the club with a gavel. The president announced that she had tickets for

the Children's Concert Series which is sponsored by the Junior Civic League and urged members to encourage their children to attend.

Prizes for bridge were awarded to Mrs. C. R. Milone and Mrs. Delbert E. Prickett and for canasta, to Mrs. Ray Almon, Miss Joy Doner, Mrs. Roy Engler and Mrs. Oka Carlson.

Mrs. Edward G. Caruthers, Mrs. Harold E. Kelly and Mrs. Maurice E. Kerr will be the hostesses for the March meeting.

Reservations for the March meeting may be made by the Chillicothe members with Mrs. Steven George, phone 2-4332, Mrs. Al Davis, phone 2-4129, or Mrs. Hugh Hilliard, phone 2-7860. Waverly and Lake White members are asked to contact Mrs. Robert Neff, phone Waverly 769M. Reservations must be made by Monday, March 1, and cancellations will not be accepted after this date.

#### BADGES

(Continued from page 1.)

It is suggested that employees maintain their badge consciousness outside the plantsite by removing the badges when they leave work.

Removing the badge upon leaving work accomplishes two purposes: The chance of losing the badge is greatly reduced and by not displaying the badge in public, no undue attention is directed at the employee. When the badge is worn outside the plant it tends to cause some people to ask unnecessary questions concerning plant operations. Such questioning could lead to the giving out of information that outsiders have no need to know.

#### TELEPHONE SYSTEM

(Continued from page 1.)

erators will handle the board during the night shifts.

The IBM tabulating service department issued a new directory.

In addition to the regular switchboards there is a "trouble" desk.

The telephone department has 18 employees. They are: Norma Copen, chief operator, Kathleen Matheson, Grace Graves, Opal Stonnell, Patricia Mantel, Mary Wolfe, Alice Buyers, Clotine Meyers, Paul Rawlins, Roscoe Days, Joe Talkington, Carol Johnson, Ruth Tipton, Velida G. Tackett, Nellie Laney, Betty Kilgore, Nina Webb, and Olivene Collier.

#### Crabtree-Rader

Mr. and Mrs. Bert Crabtree of Beaver Route 2, announce the engagement and forthcoming marriage of their daughter Alice to George Rader, son of Mr. and Mrs. Monford Rader of Beaver.

Alice is employed in the personnel records section of GAT, while Mr. Rader is stationed in Florida with the Air Force.

Alice's father also is an employee of GAT. He has charge of GAT's insurance program.

#### Estep-Reed

Martha Estep, daughter of Mr. and Mrs. Robert Estep of Beaver, has announced her engagement and forthcoming marriage to Ronnie Reed of Lynx.

Miss Estep is employed in the stores department of the Goodyear Atomic Corporation.

Mr. Reed is employed in the motor pool of Peter Kiewit Sons' Co. The couple has not set a date for the wedding.

#### McCOMBS NAME SON JOHN

A son was born to Mr. and Mrs. Henry E. McComb of Waverly last month. The new arrival was named John.

He was born in University Hospital, Columbus, at 6:00 p. m. on January 27, and weighed seven pounds three ounces.

The father is employed by Goodyear Atomic Corporation in plant engineering.

### Goodyear Atomic Bridge Club Formed; Holds Meetings At Lake White Club Semi-Monthly

#### SIMPSON 'TRAVELS', BUT DOESN'T MOVE

W. R. Simpson does a lot of "traveling" but never gets anywhere.

If this sounds contradictory, read on! Simpson, who is supervisor of traffic in the purchasing and materials division, does his "traveling" while sitting at his desk in the Goodyear Atomic warehouse building at plantsite. His travels are via such media as letters, telegrams and telephone.

As his title, supervisor, implies, he handles travel accommodations for everything from furniture to reservations for Goodyear Atomic employees moving or traveling on official business. In addition he handles the filing of claims involving a loss or damage to freight.

#### Talks to Many Places

"I talk to about every town in the Union," Simpson said, "and that includes cities and hamlets."

Before making an official trip the employee generally sees Simpson, if he is going in any manner other than his personal car. Simpson makes reservations for air, rail, bus and water itineraries.

Although this involves a considerable amount of work, Simpson has many other duties. Among them are the routing of inbound and outbound freight shipments via rail, reasonable and fastest routes; obtaining refunds for unused travel tickets; arranging the movement of personal household goods into the plant area and filing claims for damages and losses for same.

Other items upon which he checks include: conversion of commercial bills of lading; maintaining of daily records on inbound carload freight for demurrage payments; tracing rush shipments and finally, filing claims for lost and damaged freight.

The Bridge Club formed by Goodyear Atomic families has voted to meet on the first and third Fridays of each month. The club, which was formed recently, has gained numerous members since it started.

Mrs. Marguerite Montgomery has opened the facilities of the Lake White Club as a meeting place. She also presented the prizes at the first meeting held at the club last month.

The prizes went to Dick Keates for the men's first and to Mrs. Arthur Clary, who was first among the ladies. Mrs. Clary won a salt and pepper shaker set, while Dick was presented with a bean bag ashtray.

Charlie Josifek was named chairman of the club and will serve until officers are elected. The election is expected to take place after the club has been in operation long enough to allow all interested persons to join. Different hosts and hostesses are chosen for each meeting.

Josifek said the club is open to all Goodyear Atomic Corporation families regardless of where they live. There were several Chillicothe and Portsmouth residents at the first meeting and it is hoped that all areas will continue to be represented.

The hostesses for the next meeting, which will be held at 7:30 p. m. February 19, are Mrs. G. H. Reynolds and Mrs. William Armstrong.

Mrs. Armstrong was elected publicity chairman at the last meeting and Mrs. Cynthia Schrier was named treasurer.

Mrs. Reynolds won first place women's honors and Art Clary won the men's first place prize.

Mr. and Mrs. Josifek served as host and hostess at the last meeting.

## FOOLING THE PEOPLE

Almost every school child knows what Lincoln said about fooling the people. This is a wise saying, as the Great Emancipator used it. But in seeking the security of A. E. C. projects and information, we cannot risk leaving any Goodyear personnel fooled any of the time.

Washington and Lincoln, whose birthdays we observe this month, were great dreamers—great because they turned vision to reality. They continuously used their positions and their personal powers to promote all the basic freedoms.

The examples of these Americans are well worth recalling in this year of 1954. Washington, leading a new-born nation in its fight for independence, had serious difficulties with disloyal and subversive "insiders". To protect his people from the wiles of the Tories and the agents working within the new republic, he cautioned:

"Be courteous to all, but intimate with few and let those few be well tried before you give them your confidence." Also:

"There is no restraining men's tongues or pens when charged with a little vanity."

Yes, Washington knew the dangers of loose talk, rumor and carelessness. He recognized words as weapons of greater power than guns. So his problem in 1776 was little different from ours in 1954.

Lincoln consolidated the union with truth, wisdom, and courage. He spoke and acted to calm his people's fears; he knew the great harm of rumor, loose talk and panic. His Gettysburg address is the poetry of a plea for the loyalty, unity and security, which would bring a new, better democracy. Typical is his declaration that "loving, brave, patriotic hearts are better than gold."

Washington, the "General without fear or reproach" and Lincoln, the "statesman without guile or shame", gave Americans a faith to live by. In striving to achieve their ideals of loyalty, unity, liberty and truth, we also offer promise to the world of an even better democracy.

As we pause this month to revere the names and review the work of Presidents Washington and Lincoln, let us all accept our responsibility to keep their faith alive and their ideals a reality. Let us subdue rumor, subversion, loose talk and espionage with truth, knowledge, loyalty and unity.

Let us be conscious of our "new birth of freedom," and give "what it takes" to preserve and enjoy it.

Courtesy Security Department

## WIVES OF GAT MEN SERVE ON CLUB LUNCHEON COMMITTEE

Eleven of the women who served on a recent luncheon-bridge committee at the Portsmouth Newcomers Club are wives of the Goodyear Atomic Corporation employees.

Goodyear Atomic wives on the committee were: Mrs. H. H. Stoops, Jr., chairman, Mrs. Lloyd E. Fuller, co-chairman, Mrs. John F. Hogan, Mrs. Hugh F. Porter, Jr., Mrs. George A. Poole, Mrs. Thomas W. Leary, Mrs. Frank J. Wood, Mrs. Charles W. Humphreys, Mrs. Louis F. Lauxterman, Mrs. Marvin D. Lowman, Mrs. Howard L. Caterson.

The luncheon-bridge was held February 11, at the Elks club.

## FOURTH CHILD FOR LEARYS

Patrick Francis was the name given to the new family member of Mr. and Mrs. Tom Leary of Portsmouth.

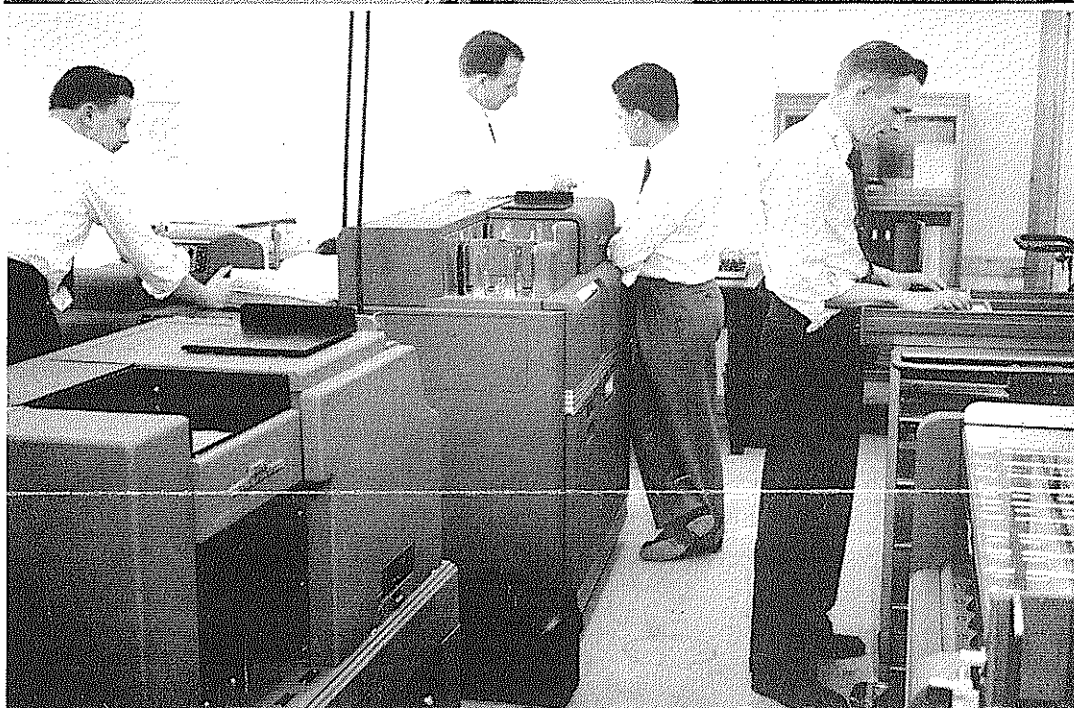

Patrick Francis was born at 10:30 a. m. January 23, at Mercy Hospital. He has two brothers and a sister. The father is superintendent of process maintenance.

## PHELPS SUFFERS FRACTURE

Robert Phelps, a production employee, suffered a fractured right arm last month when he slipped on the ice while unloading his car.

Phelps reports that he will be more than happy when the cast is removed.

## IBM SPEEDS WORK FOR FINANCE DIVISION

Goodyear Atomic Corporation's IBM machines are now in operation. The new operators, in top picture, are shown getting acquainted with the new equipment. Talking with Len Fisher, supervisor of the tabulating department, is Greta Hunt. In front of Mrs. Hunt is Ruth Singer and to the left is Betty Fleming. Helen Hedrick is in the right foreground. Working at the machines shown in the lower picture are Andrew Clausing, right, an operator, and Roy Christopherson. Christopherson is in charge of the machines. In the center are IBM representatives, Norris Halstead and George Shepard.

## Goodyear Atomic IBM Equipment Now In Operation

Goodyear Atomic Corporation's IBM tabulating service department is now in operation.

The IBM—International Business Machine—is an efficient and systematic method of recording company operations.

Leonard Fisher, supervisor of the tabulating service, explained that the IBM tabulating service was set up primarily to perform many of the finance division's functions on a mechanical basis, such as payrolls, the maintaining of plant and property equipment records, and accounts payable. In the short time between December 28, 1953 and January 8, 1954, the tabulating service department set up Goodyear Atomic's hourly and salaried payrolls under the punch card system.

Fisher also said that the IBM is capable of performing such jobs as the printing of the recent GAT, plantsite, telephone directory and the 150-page plant and property equipment catalogue. The department can,

according to Fisher, perform services for any department in GAT that requires methodical and efficient handling of functions at machine speeds.

### Punch Card System Used

The IBM uses the punch card system as the basic method in converting source data for use in the machines. All data that is handled by the tabulating service department is punched on to a card. After the material has been punched on to the cards they are then sent to the card verifying machine for an accuracy check. This verification is done by an operator who punches the keys of the verifying machine while reading from the same data from which the card originally was punched. Any difference between the two cards causes the machine to stop and indicates a discrepancy between the original material and the punched card.

A card may go to several different machines before it is put on file. Each machine that the card travels

through adds to or detracts from the original data. In addition to Fisher there are six people in the IBM tabulating service: Roy Christopherson, Andrew Clausing, Greta Hunt, Betty Fleming, Helen Hedrick, and Ruth Singer.

Some of the women have had several years of experience in tabulating installations, and all of the female employees received training at either Columbus or Cincinnati. The male operators had previous working experience with IBM machines.

## SON BORN TO BURKHOLDERS

The son born to Mr. and Mrs. Clay Burkholder has been named Jeffery. Clay is in plant engineering.

Jeffery was born at 12:15 p. m. January 28 at Portsmouth General Hospital and weighed seven-pounds and five and one-half ounces. He is the Burkholder's third son.

## SAFETY CONCERNS EVERYONE

## Bridging The Ridge

By W. O. Phillips

Clan's Oak Ridge Correspondent

### WIVES CLUB MEET

Interior decorating was the subject of discussion at last month's meeting of the Goodyear Wives Club here in Oak Ridge.

The meeting was planned by Nina Cutts and was presided over by Mrs. B. W. Penland.

The main speaker, invited by Shirley Crandall, was Mrs. Wild of Oak Ridge.

Various phases of interior decoration were discussed. Samples, which were provided by the speaker, were displayed. A discussion period followed the address.

A vote of thanks went to Mary Lou Shields and Marie Broudy for the decorations and refreshments.

The club also elected Marie Broudy as its new chairman and Harriet Wise as secretary-treasurer.

The next planned event for the group will be a dance on Washington's birthday on February 22nd.

### Personnel Change

The following GAT personnel have been reassigned:

To Portsmouth—M. F. Line, of the laboratory division, and family; C. F. Trivisonno, of the laboratory division; F. A. Koehler, of the laboratory division; and C. Warren, of the development division.

To Paducah—G. P. Manos, of the development division; H. Sarafian, of the development division, and family; and R. O'Connell, of the laboratory division.

### Thanks To DeVito

Many thanks for the excellent job done by Vince DeVito, former *Clan* reporter in Oak Ridge. He will be missed not only in a literary capacity, but also as a bulwark on the Goodyear Atomic bowling team.

### Former GAT Man Marries

Merrill T. Oakley, former GAT technical man, married Donna Nygard on Monday, January 19, at St.

Mary's Roman Catholic Church, Oak Ridge. Mrs. Oakley, has been employed in the cashier's office at the K-25 plant for one year. Private Oakley, from St. Louis, Missouri, is now stationed in Arkansas with the Army.

### New Personnel At Ridge

New arrivals in Oak Ridge to continue training include: M. W. Powell, of the laboratory division, and wife; J. E. Swann, of the laboratory division; P. E. Milam, of the laboratory division; W. D. Hall, of the laboratory division, and wife; G. A. Rumpy, of the laboratory division; W. M. Poor, of the maintenance division; M. Collier, Jr., of the maintenance division; E. K. Cochran, of the maintenance division; P. R. Cornett, of the maintenance division; F. S. Lallow, of the development division; T. G. Parker, of development engineering; H. G. Johnson, of the production division; and J. W. Duncan, of the production division.

### New Arrival

William B. Nixon of the production division and his wife Louise announce the birth of an eight pound and four ounce baby girl, named Ann Louise Nixon. The baby was born on January 26th, at the East Tennessee Baptist Hospital in Knoxville.

## National Engineers Week Observed February 21-27

G. H. Reynolds, manager of production for Goodyear Atomic Corporation, will represent GAT at the panel discussion to be presented over Portsmouth's two radio stations, WNXT and WPAY, during National Engineers Week.

The broadcasts will be at 9 p. m. February 22 on WNXT and at 9 p. m. on February 25 over WPAY.

## In The Service

The following addresses were received during the last month from our GAT employees who are now in Military Service:

### SEAMAN NEW SHRINE V. P.

R. H. Seaman, Chief of Goodyear Atomic Corporation's police force, is the new vice president of the Portsmouth Shrine Club.

Chief Seaman was elected to the post at a meeting held last month.

## SCOTT SETS NEW SINGLE GAME SCORING RECORD

### Atom Smashers Roll Into First Position In Intramural Program

The Atom Smashers are leading the GAT sponsored intramural basketball league of Portsmouth.

The Atom Smashers have won two and lost none at the end of the third week of play.

They are followed by the Flatfoots and Isadopes who are tied for second place honors, each having won a game and lost a game.

The Wheels and Radio Actors are tied for third place with their record of one win and two losses.

High game star is Sonny Ross who racked up 23 points when the Radio Actors defeated the Wheels 41-27.

### Play At Trinity Gym

The games are played every Tuesday night in the gymnasium at Trinity Methodist Church, Portsmouth.

There are two more games remaining in the first round of play. Following the second round of play the winners of each round will play for the championship.

Other individual stars who have netted high scores in individual games are Charlie Kinker, Isadopes, 16 points; Dick Dobbin, Isadopes, 16 points; Charlie Flaig, Atom Smashers, 16 points; Harold Everett, Isadopes, 14 points; Harry Meecham, Wheels and Bob Gaura, Flatfoots, both with 13 points; M. R. Adkins, Atom Smashers, 12 points; Gene Harris, Radio Actors, 12 points; Bob Allen, Wheels, 11 points; and Ed Ellis, Wheels, nine points.

### Activities Night Held At Chillicothe; All GAT Men Invited To Attend Event

Aching muscles and tired backs are no longer the pattern for the participants in the activities-night held in Chillicothe.

For several weeks now, men from the Chillicothe Area have been gathering for an evening of fun and exercise. The exercise comes from two hours of volleyball and basketball.

This regular weekly diet of exercise has eliminated, to a great extent, those original aching muscles and tired backs.

If there are any athletes in the area who want to join the group, all you have to do is show up at Central School gym, corner of Paint and Sixth Streets, Chillicothe, at 7:30 p. m. on Monday nights.

### SON BORN TO BATES FAMILY

The son born to Mr. and Mrs. Philip Bates, Jr. of Chillicothe has been named Benjamin Johnson Bates.

Benjamin, whose father is in the production division of Goodyear Atomic Corporation, was born at 10:34 p. m., January 25, in Chillicothe General Hospital. He weighed seven pounds and 12 ounces.

### Schneider Takes Bowling Lead; Daily Ties Pickens' Single Game High Score

Jim Daily has tied the bowling record set by Fred Pickens several weeks ago in the Chillicothe Bowling League.

Daily, a substitute bowler, racked up a 224 to tie Pickens. Pickens still holds the high for the three-game series with 612.

The honors for high bowling as a regular go to Dick Schneider who is clipping along at 163 as of February 5. Schneider replaced Steve George who has an average of 160.

The Maintainers still hold the team lead with 38½ points on 29 games won, 21 lost, one tie.

The Maintainers are followed by the Vacuums and Industrial Relations, both with 35 points, and the Operators with 26½ points.

### GAT Bowlers Donate To March Of Dimes

Goodyear Atomic bowlers didn't bowl as well as usual one night last month. The following facts may indicate the cause of their trouble.

The four teams in the league voluntarily punished themselves financially when they made mistakes. The "mistakes" money went to the March of Dimes Foundation. The four teams—The Maintainers, The Vacuums, Industrial Relations, and The Operators—raised \$11.45 for this worthy cause.

The penalties ranged in price from 50c down to 1c. The 50c "boners" were levied when the teams failed to maintain their average.

Committing a foul cost 10c, while missing the headpin cost 3c. Other penalties included: missing a one pin spare, 2c; bowling a gutter ball, 5c; failure to mark in the tenth frame, 3c; scoring less than six pins on a spare, 1c for each pin. If an individual failed to bowl his average it cost him 5c.

The nickles, dimes and pennies flowed quite freely into the "kitty". The four teams are to be congratulated for the thoughtfulness of their donations.

### Jones Undergoes Surgery

Dick Jones, supervisor of recreation, has returned to work. Jones underwent an emergency appendectomy in Chillicothe General Hospital last month.

### Goodyear Atomic Corporation

P. O. Box 628

Portsmouth, Ohio

### Hits For 37 Markers In Industrial League; Tourney Next Week

Connie Scott, a maintenance trainee, set a new basketball scoring record in the Portsmouth Industrial League for an individual player in a single game when he racked up 37 points last week.

Scott, who plays with Goodyear Atomic Corporation's team in the industrial league, set the new record in a game played against the Marine Corps Reserves.

### Old Record Held By Ross

Scott's record smashed the old record which had been held by a fellow teammate, Sonny Ross, of the engineering department. Ross had held the high score with 33 points.

One game remains to be played in the second round competition before the teams start into the tournament to be held next week.

The drawings for the tournament, which will be held at either Scudder or Wilson School, will be this week. It is a double elimination tournament with the winner advancing to the regional tournament to be held in Huntington, West Virginia.

Charlie Gooch, a training instructor who coaches the team, said that GAT employees are urged to back the team by attending the games held during the tournament play.

"It would be a valuable asset to the team," Gooch asserted.

### Team Shows Improvement

The team has shown improvement in the second round and is expected to be a tough competitor in the tournament. As of February 9, the team had won 3 and lost 2. In the first round the team won 4 and lost 3.

Gooch said that in addition to Scott and Ross, eight men were active in the industrial league play.

He listed them as: Asbury Crum, an officer on Goodyear's police force; Orlando Vita, an instructor; Charlie Kinker, vacuum testing; Tom Taulbee, vacuum testing.

Terry Crisp, reproduction department; Dave Zelinski, an instructor; Harold Everett, an operator trainee; Ramey Hoskins, an operator trainee.

Other teams in the league are: Kay's, Peter Kiewit Sons', Ann's, Selby's, Gulick, Marine Corp Reserves, and Ideal.
