THE BEST IS YET TO COME

VOLUME III

PIKE COUNTY, OHIO, WEDNESDAY, SEPTEMBER 19, 1956

NUMBER 12

"GIVE ENOUGH! THE UNITED WAY" IS THEME OF GAT'S 1956 ALL-IN-ONE CAMPAIGN SET FOR OCTOBER 15-22

Review — OF — Labor Relations

The following six grievances were heard by Impartial Arbitrator Frank R. Uible on June 18 and 19.

Grievance I-56

Grievance: Union claimed four hour minimum overtime pay for time spent changing clothes and washing after the end of a scheduled shift.

Discussion: The aggrieved completed their assignment of work before the end of the shift. They were required to change clothes and wash after the end of their scheduled shift. The Company paid .2 hour overtime for this activity after the end of their shift. The arbitrator held that where the grievants are required to wear Company-issued clothing and must change and wash, this activity is part of the work that they are required to perform within the meaning of the four hour minimum overtime clause. He recognizes that there are many employees whose changing of clothes and showering is not compensable time.

Award: Grievants to be compensated for the difference between the overtime paid them and four hours pay at their base hourly rates.

Grievance I-58

Grievance: Union claimed maintenance of Assay Spectrometers in the Cascade.

Discussion: The duties of Instrument Mechanics are the maintenance of equipment of an instrumentation nature. The automatic mass analyzer is of an instrumentation nature. Therefore, the normal duties of Instrument Mechanics would be the maintenance of the automatic analyzer. The fact that this work has always been done by non-bargaining unit personnel is not material.

Award: In the future the maintenance of the automatic mass analyzers in the Cascade will be performed by bargaining unit personnel.

Grievance I-63

Grievance: Union claimed right to negotiate compensation for time spent in handling identification badges and changes in parking lots as the result of the permanent security fence.

Discussion: From the beginning of the operation parking areas have

(Continued on page 2)

GAT Influenza Inoculation Shots Available At Plant Hospital On October 1

Inoculation shots against influenza again are being offered on a voluntary basis to all Goodyear Atomic employees.

Employees can receive their shots anytime on or after October 1. The company would like to see employees take advantage of this service inasmuch as it is offered as a preventive measure.

The medical department says the shots can be obtained at the hospital anytime.

Employees who are allergic to egg, chicken, or chicken feathers should not take the shots.

Employees who had the original shots last year need only booster shots, 1/2 cc.

Rita Walsh Transferred To Goodyear Home Office

Rita Walsh, secretary to the general manager, D. H. Francis, was transferred, effective September 10, to the parent company, The Goodyear Tire & Rubber Company, Akron.

She is now secretary to R. W. Fitzgerald, general merchandising manager in the tire sales organization.

Miss Walsh, who joined the Goodyear organization November 19, 1943, has been with Goodyear Atomic nearly four years. She became secretary to GAT's first general manager, A. J. Gracia, on September 19, 1952 — the day after the Atomic Energy Commission announced that Goodyear would operate the plant.

Miss Walsh's first job with Goodyear was as a stenographer in the fuel tank sales organization. Two years later she was promoted to secretary to R. W. Richardson, manager, aviation products division. She remained in that organization until her transfer to Goodyear Atomic.

Her major hobbies are golf and bowling.

Miss Walsh, while employed at GAT, lived with her mother in Chillicothe.

FAYE ROSE, Department 202, views the new United Fund-Community Chest symbol which was adopted this year. This symbol is being used by both Community Chest groups and United Fund organizations throughout the country. The theme for this year's campaign is "Give Enough! The United Way."

GAT Educational Assistance Program Adopted; \$100 Is Maximum Tuition Aid

An educational assistance program, designed to encourage Goodyear Atomic employees in the technical field to further their formal education, has been approved.

Employees, to be eligible, must have had six months service, be on the active payroll, plus meeting minimum educational requirements. Under this program the company will provide financial assistance to salaried and hourly employees who qualify and whose course of study is approved.

The assistance, consisting of \$100 maximum for tuition, will cover a twelve-months period.

"We believe this program," D. H. Francis, general manager, said, "will improve the performance and promotional possibilities of the participating employees."

The employee, after receiving approval of the course requested, enrolls for the prescribed study at any accredited college or university and pays the tuition fee. Upon proof that the course has been completed satisfactorily, the company will refund to the employee the money he has paid for tuition up to a maximum of \$100 in any twelve-month period. Laboratory fees, books, etc., are excluded.

Approved courses, which must be in the technical field, may be taken at any accredited college or university or extension programs in nearby cities. Applications will be screened carefully in order to determine that the applicant's selected course of study will qualify for assistance.

When it is necessary, the company may approve group courses for six or more employees. The group courses may be conducted on plantsite or near the plantsite. The employees who are approved for enrollment in such courses will not be charged for the course but must satisfactorily complete the course or courses.

The company, under certain circumstances, will advance tuition money up to a maximum of \$50 for one semester's study. An advancement of

(Continued on page 2)

Only Drive Permitted During Year; Money Is Given To Local Groups

"Give Enough! The United Way."

That is the theme of Goodyear Atomic's third annual All-In-One Campaign, which will be launched October 15, 1956.

The campaign, which lasts seven days, will be concluded October 22.

The All-In-One Campaign is designed to concentrate charitable solicitations into one campaign, thus eliminating other drives.

Paul F. Bliss, community relations coordinator, has been named chairman of this year's campaign. Serving as co-chairman will be E. L. Hill, who is vice president of Local 10-689, Oil, Chemical and Atomic Workers Union. Hill is in Department 732.

Chairmen Bliss and Hill pointed out that the employees' contribution to the All-In-One Campaign will be the only time during the year when employees will have the opportunity to contribute to the many charitable organizations in the area. The corporation limits in-plant solicitations to the All-In-One Campaign.

Area Groups Benefit

They went on to remind employees of the many area groups that will benefit from the money contributed to this campaign.

As in previous years, day to day progress of the campaign will be recorded on red feather "thermometers" strategically located at the two main portals.

Participation can be made by a

(Continued on page 2)

A BIRTHDAY

Goodyear Atomic has a birthday!

Four years ago yesterday, September 18, 1952, the Atomic Energy Commission announced that The Goodyear Tire & Rubber Company would operate this plant.

A cadre was named by the parent organization and then a subsidiary, known as Goodyear Atomic Corporation, was formed.

In the intervening years, all units have been put into production and a steady-state level of operations has been attained.

JERRY WELLS, Department 824, is one of several hundred employees who has joined the Atomic Employees Credit Union Incorporated. Wells' membership card is being completed by Laura Krohn, assistant treasurer of the credit union. The credit union is located on the first floor, south wing, X-100 Building. Office hours are from 8 a. m. to 4:30 p. m. Their telephone number is 2551.

Employees Trying To Help Blind By Collecting Tapes Hear It Is A Rumor

Several small boxes have been placed around various parts of the plant on top of cigarette machines, in order to collect the cellophane tapes that seal cigarette packages. This was done, according to the writing on the boxes, to help some blind person obtain a seeing-eye dog.

A cigarette manufacturer, in a letter to a Goodyear Atomic employee, said it would not furnish a "seeing eye" dog to a blind person in return for a given number of red opening tapes.

"Please be advised," the cigarette company wrote in its letter to the GAT employee, "that there is no truth whatsoever in this rumor," (that the cigarette company would supply a seeing-eye dog in return for a given number of red opening tapes).

The cigarette company said this same rumor has sprung up several places around the country, sometimes about "this company and sometimes about other companies."

The company said it didn't know how the rumors got started. "We have cooperated closely with the Seeing Eye Organization," the cigarette company said, "to prevent the spread of such rumors, and some time ago, at our expense, Seeing Eye, Incorporated, addressed a letter to every daily newspaper in the United States, advising the editor and his staff that, should any such rumor spring up in his community, it is untrue and should be denied."

The GAT employees who were collecting the tapes did so in good faith, trying to help the blind, and are to be commended for their effort. However, unfortunately, there is no truth whatsoever in the rumor that seeing-eye dogs will be supplied to a blind person by any tobacco company in return for the cellophane tapes.

EDUCATIONAL ASSISTANCE PROGRAM

(Continued from page 1)

tuition money will be made only when the employee agrees to repay the money, at the rate of not less than \$10 a month, before the course is completed. Repayment must be made by payroll deduction.

Employees will attend the courses outside their regularly scheduled working hours. The selection of the college or university at which the employee wishes to study remains the choice of the individual. The only stipulation is that the school be an accredited institution of higher learning.

The financial assistance program has been adopted because the company felt it should be instrumental in providing educational advancement for eligible employees who have the initiative to further their education while employed by Goodyear Atomic Corporation.

The company needs to have some general idea of what interests qualifying employees will have in this program. If you are interested, or presently enrolled, fill out the blanks in the box listed below and send to the training department, X-100 Building.

.....,

LABOR RELATIONS

(Continued from page 1)

been changed and portals of ingress and egress have been established and changed. A perimeter fence was erected and certain changes were made in the issuance of the identification badges. All of this has caused more rigid and, in many instances, longer routes from parking spots to work area. There is no provision in the Agreement that clothes the arbitrator with authority to order a negotiation on the matter.

Award: Grievance dismissed.

Grievance 1-69

Grievance: Union claimed that vacation is earned by the months spent on the active payroll and where employees quit with more than one year but less than two years service they were entitled to pro-rated vacation pay in addition to one week.

Discussion: An employee's vacation expectation does not ripen to an earned vacation until and unless he has reached his anniversary date and at that time is on the payroll and working. Since the grievants have not completed two years service, they have not earned a second week of vacation or any proportionate share of it.

Award: Grievance denied.

Grievance II-30

Grievance: Union claimed "R" Shift was limited to day time relief only and objected to relieving on night shifts.

Discussion: It is a well established principle that neither party can rely on past practice when such past practice is in conflict with the clear terms of the contract. The Company may temporarily assign employees to a schedule other than standard hours.

If two "R" Shift men were assigned, one to the second and the other to the third shift, then the senior employee would exercise his preference. The arbitrator noted that this right of preference is not absolute. The phrase "consideration will be given to senior employees requests for shift preference" indicates that factors could intervene to veto his preference.

Award: Grievance dismissed.

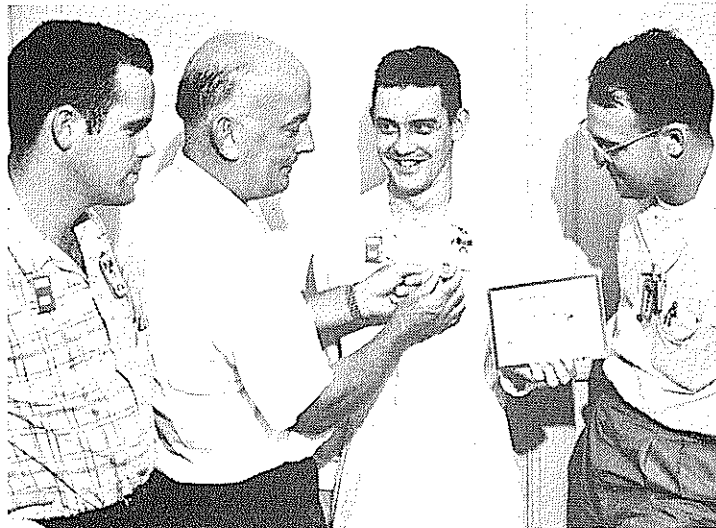

Grievance II-32

Grievance: Utility Operators insist that sweeping the floors and keeping the areas surrounding the equipment in good condition be assigned to Janitors.

Discussion: The Union argues that since there is a Janitor Classification the parties by inference have agreed that work traditionally done by Janitors is to be assigned to them. The arbitrator does not concur in this inference. The utilities operators do and have been doing certain housekeeping chores, such as cleaning equipment and the floors in and about the work area. This type of work has been done by employees in this classification since the inception of their employment. In view of the past practice, we cannot conclude that the current practice is in violation of contract terms.

Award: Grievance dismissed.

A long face often shortens your list of friends.

THOMAS R. COX, Department 824, is presented his badge and membership certificate in the Wise Owl Club of America by G. H. Reynolds, manager, production division. Looking on are Jack Wheeler, Department 824, left, and Ray Davis, Department 824, right. Cox's eyesight was saved by wearing protective equipment when acid splashed against his face.

Fire Prevention Week Is October 7-13; Lectures, Demonstrations Are Planned

Dr. D'Ianni To Address Area ACS Next Month

Dr. James D. D'Ianni, assistant to the vice president for research and development of The Goodyear Tire & Rubber Company, will be the guest speaker next month at the Central Ohio Valley Section meeting of the American Chemical Society.

The dinner meeting will be held at 7 p. m., Thursday, October 4, at the First Presbyterian Church in Ironton.

All who are interested in attending can make reservations through F. A. Koehler, Department 615.

Dr. D'Ianni has his undergraduate degree from the University of Akron and his doctor's degree, in organic chemistry, from the University of Wisconsin. He has been with Goodyear since 1938 and became assistant to the vice president in 1952.

ALL-IN-ONE CAMPAIGN

(Continued from page 1)

cash donation or payroll giving.

The payroll giving works in this manner: A pledge card is prepared for the employee upon which he may designate the amount he wants to contribute. It also authorizes the company to deduct the stated amount by the week or month as designated by the employee.

Donor's Choice

The money that is contributed will go to the area of the donor's choice. If a person does not specify to which area the contribution is to be sent, it will be divided proportionately among the four counties in the area.

The corporate gift, as in previous years, will be distributed to the counties in the same ratio as is indicated by the individual contributions.

A pamphlet answering the most-often-asked questions concerning the GAT All-In-One Campaign will be distributed to all employees prior to the campaign kick-off date. If your question isn't answered in the pamphlet, call community relations, extension 2514, and let them get the answer for you.

Lectures, posters, and fire fighting demonstrations will be used by Goodyear Atomic Corporation to promote Fire Prevention Week, which will be from October 7 through October 13.

"The purpose of Fire Prevention Week," said GAT's Fire Chief, O. F. Tussey, "is to make employees aware of potential fire hazards both at home and at the plant."

Lectures

Lectures and fire demonstrations will be given at the plant by members of the fire department to emphasize the inherent dangers in fires. Posters also will be used.

Safety Meetings

The safety and fire protection department is urging each GAT department to hold its monthly safety meeting during Fire Prevention Week and use that theme as the topic for its safety meeting. Representatives of the fire department will talk to the departmental safety meetings, if requested.

Requests for speakers during this week should be made to community relations.

Demonstrations

The Chief said the fire department will give demonstrations, particularly in the field of first-aid fire fighting equipment, which will aid employees should the need arise. Extinguishers, etc., are in the first-aid fire fighting equipment category.

Fire Prevention Week is based on the anniversary of the great Chicago fire that occurred on October 9, 1871. It claimed the lives of 250 persons in one of the most costly and destructive fires in all history.

Chief Tussey said every year fires claim millions of dollars in damage and cost many lives.

"This is why we have a Fire Prevention Week," the Chief said.

About the best way to solve your problem is to swap it with the other fellow. He always knows how to solve every problem except his own.

GIVE ENOUGH! THE UNITED WAY

Not too long ago charity was a face to face relationship. Communities were small, and neighbors were few. The needs of each person were known to everybody, and the welfare of the people was a common concern.

Today the need for charitable giving remains but the circumstances under which giving is accomplished are completely changed. Towns, even smaller towns, are, as a result of improved transportation, spread out over a wider area. We no longer know the circumstances of all our neighbors. We still have the same concern for the welfare of others but the demands upon our time; our involvement in a multitude of activities, and the quickening pace of modern society, prevent our rendering adequate face to face, personal, help.

The skill of the trained social worker has increased greatly. But so has the cost of administering adequate care. Also, charity, as described by the representatives of the agencies supported by your United Fund, is no longer the correct word for the type of help given to the less fortunate. Rehabilitation, the correction of the difficulty so that the individual can return to society and contribute his share to community life, is the new goal.

A community is only as strong as the combined strength of all its people. Therefore, when you give — Give Enough — The United Way — to help strengthen your community.

D. W. Francis

Finance Division Lists Safeguards For Cashing Checks; Protects Against Loss

Payroll checks should be personally endorsed *exactly* as drawn to your order on the face of the check.

The finance division says the majority of Goodyear Atomic employees are doing an excellent job in this respect but there are still a few who do not properly endorse their paychecks.

They report that some checks are deposited without endorsement, some have the endorsement printed instead of written, and still others are signed by other individuals, such as a wife signing her husband's name.

The finance division offers the following suggestions as safeguards to employees when depositing or cashing any checks:

First: If you are sending checks to a bank for deposit to your account, they should be endorsed:

"For Deposit Only"

(employee's written endorsement) with the signature written *exactly* as ordered on the face of the check.

Second: If you are cashing checks at a bank, grocery store, etc., don't endorse them until you are about to receive cash. If you want to endorse checks to your wife, husband, or someone else so they can deposit to their account or receive cash, endorse them as follows:

"Payable to the order of" (wife, husband, or other person) (employee's written signature)

This protects the person to whom the checks are then made payable until such time as they endorse for deposit or arrive at a bank or grocery store and endorse them when they are about to receive cash.

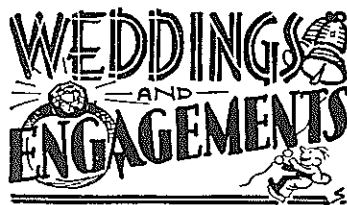

By endorsing checks "For Deposit Only" or "Payable to the order of" or withholding your personal written endorsement until you are about to receive cash, you are protecting yourself or others in case checks are lost or stolen and fall into the possession of unscrupulous persons who may attempt to cash them by forging.

Elected Officers

Two Goodyear Atomic employees have been elected officers of the Chillicothe Subsection, American Institute of Electrical Engineers for 1956-1957.

They are H. M. Kallaher, Department 813, and F. S. Kalisik, Department 851. Kallaher was elected chairman and Kalisik, secretary-treasurer.

Failure to hit a target is never the fault of the target.

Kinker-Clifford

Mr. and Mrs. H. H. Kinker, of Portsmouth, announce the engagement of their daughter, Katherine Ann, to Roland Keith Clifford, son of Mr. and Mrs. George Clifford. Miss Kinker is in Department 424.

Norman-Teeters

Miss Phyllis Norman and Rodney Teeters were married last month in Bethany Baptist Church, Rushtown, Ohio. Mrs. Teeters is in Department 252. Teeters is employed by Detroit Steel Corporation.

Huffman-Bowling

Miss Phyllis Huffman and Marvin Bowling were married last month in the Nazarene Church of New Boston. Mrs. Bowling is in Department 411. Bowling is employed at Detroit Steel Corporation.

Mr. and Mrs. W. R. Ellis, (Department 423), daughter, Becky Lynn.

Mr. and Mrs. Glen Kizer, (Department 722), son, David Allen.

Mr. and Mrs. R. A. Orlett, (Department 851), daughter, Catherine.

Mr. and Mrs. Robert Holland, (Department 644), son, Richard Dale.

Mr. and Mrs. W. C. Broce, (Department 253), daughter, Cathryn Louise.

Mr. and Mrs. William F. Hackworth, (Department 724), son, Timothy, Lee.

Mr. and Mrs. C. A. Romine, (Department 711), daughter, Regina Marie.

Mayfield Goes To Akron; Will Do Sales Promotion

R. J. Mayfield, Department 202, has been promoted to the metal products division of the parent organization, The Goodyear Tire & Rubber Company, Akron, effective September 17.

Mayfield, a native of Jackson, became a staff member of GAT's community relations department in August, 1953. Work in his new assignment will be in the field of sales promotion.

He is a graduate of Ohio Wesleyan University with a major in business administration. He is a veteran of World War II, having served in the Army Air Corps.

Mayfield is a member of the Masons, Jaycees, and Elks.

Mr. and Mrs. Mayfield have two children, Bobby and Betsy.

PATROLMAN R. E. MUNN displays a wrist watch the police department is holding for the owner. The "lost-found" drawer shown in the picture is filled with items that have been found around the plant and turned over to the police department. If you have lost an article recently give the department a call. They may be holding it.

Lost Anything? Give Police Department A Call; Hold Many Articles, Maybe Yours

Goodyear Atomic Corporation's police department has quite a list of "lost and found" articles.

Name it — scarf, raincoat, man's wedding band, money — and you might find it being "held" by the police department.

Chief of Police R. H. Seaman said the department is a "clearing house" for such articles and at the present time many of the above mentioned items are being held, just waiting for the owners to claim them.

He said some of the "lost" articles are turned into the department by GAT employees, and others are found by members of the police force as they check their "beats."

In addition to keeping records of all material turned into the department, Chief Seaman said a record is maintained of items reported lost.

Held 30 Days

The Chief pointed out the person finding the article can claim it only after a diligent attempt has been made to locate the owner of the article. Lost articles are held 30 days by the department before they are returned to the finder.

"Under no circumstances," Chief Seaman said, "can a person claim the right of possession of a lost article as against the true owner. The mere finding of an article isn't sufficient to give him legal title to it."

In addition to the above mentioned articles, the police department is holding gloves, a tie clasp, pen, keys, lip stick, woman's glove, cigarette lighter, lodge ring, and cuff links.

If you've lost an article give the police department a call. They might have it.

GOOD INVESTMENT

The National Association of Education reports that a college education today costs, on the average, \$9,000.

If you have a son or daughter approaching college, you may wonder what money returns will be realized on this investment.

The NEA says: An average elementary graduate will earn \$116,000 in his lifetime.

An average high school graduate will earn \$165,000.

An average college graduate, \$268,000.

An average technical graduate, \$280,000.

Several Papers Accepted By Technical Journals

The following technical papers, written by GAT personnel, are included among those printed in technical journals throughout the United States.

"Shutter and Motor Drive for a Littrow-Echelle Spectrograph," by Louis E. Owen, in "Applied Spectroscopy."

"Photographic Film Washer," by W. O. Phillips and David C. Manning, in "Spectrochimica Acta."

"Evaporator Feeder," by W. O. Phillips, in "Analytical Chemistry" and "RCL Counter."

"Rapid Ion-Exchange Method for Determining Total Fluoride in Impure KF:HF," by F. A. Koehler and W. A. Levier, in "Science."

"Crystallographic Evidence for the Trihydrate of Aluminum Fluoride," by R. D. Freeman, in "Journal of Physical Chemistry."

"A Note on the Infrared Spectrum of PF₅," by P. Pemsler, in "Journal of Chemical Physics."

"Experimental Method for Determination of Counting Geometry," by Ben Kalmon, in "Nucleonics."

"Piping Performs 16 Services for Industrial Atomic Laboratory," co-authored by Gene Rutledge for "Heating, Piping and Air Conditioning."

"The Sensitivity, Reproducibility, and Accuracy of X-Ray Diffraction Measurements of Retained Austenite," by K. E. Beu, for the "American Society for Testing Materials." The work was done on the above while Beu was associated with the General Motors Corporation, and published after he became associated with the Goodyear Atomic Corporation.

J. A. Pond, co-author of book, "Modern Trigonometry."

GAT'S 1956 BANQUET OF CHAMPIONS SET FOR OCTOBER 1, AT LAKE WHITE CLUB

THIS 2-POUND 5-OUNCE CUCUMBER will give the rest of you gardeners a target to beat. Jerry Stern and Marvin Tester, both of Department 624, are shown with the cucumber which grew in one of the GAT gardens in Chillicothe. Stern and Tester got assistance from Howard Foltz, Department 624, Carl Willis, Department 610, and Leo Peoples, Department 534. They agreed the size of the cucumber was sufficiently large to go around.

Touch Football Play Begins Next Month

A touch football league will start play next month at Riverside Park in Portsmouth. The five-team league will begin play October 2, and conclude on October 31.

The league play is scheduled for Tuesday and Wednesday of each week under the lights. Game time is 6:30 p. m.

The Inspectors, captained last year by Sonny Ross, are defending champions. An additional team has been added to the league roster. Team names and their captains are: "The Pros," Roger Monk, Department 725; "Padazzlers," Ollie Vita, Department 612; "The Steinkopfs," Dick Spaeth, Department 612; "Inspectors," Tom Taulbee, Department 251; "Redskins," Jim Gedra, Department 645.

MRS. O. G. McCLAIN, whose husband is in Department 242, has entered this channel catfish in GAT's fishing contest. Her catch came from a lake northwest of the plant.

Bowling Season Started; Leagues, Sponsored Teams Attract Over 300 Keglers

Goodyear Atomic's 1956 bowling program has more participants than in any of the three previous seasons.

More than 300 employees, over 11 percent of the payroll, either have started or will start, bowling in company leagues and on company-sponsored teams in the four county area.

Eighty-nine of the bowlers are women, the recreation department announced. There is a six-team women's league in Portsmouth; a six-team women's league and a sponsored women's team in Waverly; a four-team women's league in Chillicothe, and a six-team women's league in Jackson.

The recreation department said that a twelve-team men's league and a sponsored team are bowling in Portsmouth; two eight-team men's leagues, one on Monday night and one on Wednesday night, and a sponsored team are bowling in Waverly; an eight-team men's league is bowling in Chillicothe, and an eight-team men's league in Jackson.

Chillicothe AIEE Subsection To View Film, 'The OVEC Story'

The Chillicothe Subsection of the American Institute of Electrical Engineers will open its 1956-1957 season at 8 p. m. Thursday, September 27, at the Columbus and Southern Ohio Electric Company meeting room on East Main Street in Chillicothe, Ohio.

A new feature length film "The OVEC Story" will be presented. It should be of general interest to many persons on plantsite. Work also will be done on establishing new committees and scheduling future programs. All members and interested guests are invited to attend.

"Old Pros" Capture GAT Softball Crown

The "Old Pros" are Goodyear Atomic's 1956 softball champions.

The "Old Pros," who played the regular season in the Waverly League, defeated the Portsmouth League winner, Finance Team, in a best-two-out-of-three playoff.

They defeated the Finance Team, 8-7, in the first game of the playoff and 2-1 in the second game.

In other softball results, the GAT sponsored team in the Portsmouth YMCA Slo-Pitch League came in second in their league playoff. They won the second round of competition and played One-Hour Martinizing for the league championship.

GAT won the first game, 6-2, but dropped the next two games 14-2 and 7-5.

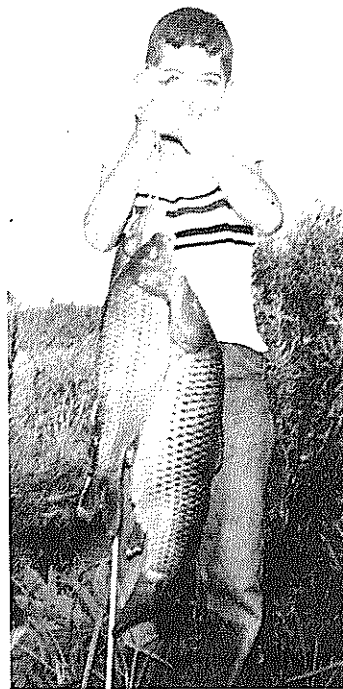

In the YMCA Slo-Pitch tournament GAT was eliminated on losses to Sciotoville by a score of 8-3 and to Ohio Power 3-2.

The Padazzlers won the tournament in the company-sponsored Portsmouth Fast-Pitch League.

PLANT ENGINEERING PICNIC

A buffet style picnic dinner was held last month by members of plant engineering at the country home of H. G. Morkassel, near Idaho, Ohio.

The 71 members and families of the plant engineering personnel, who attended the picnic, participated in softball, basketball, badminton, and horseshoe contests. In addition to all the food, there were plenty of watermelon and soft drinks, members reported.

IT WAS QUITE A FIGHT but 13-year-old R. D. "Buddy" Christman, Jr., came out the winner in the battle with the buffalo carp shown here. He is entering it in the children's category of Goodyear Atomic's fishing contest. His father is in Department 852. He made his catch in Crooked Creek, Waverly.

Portsmouth Little Theater Announces Fall Lineup

Portsmouth Little Theater will open the fall season this year with a three-act comedy, "Oh Men! Oh Women."

The play, exact dates have not been set, will be in October.

Other plays planned for the remainder of the season are, "Solid Gold Cadillac" and "Harvey". The fourth play has not been determined.

Bob Stone, Department 252, who is president of the Portsmouth Little Theater, said that membership in the organization is open to anyone who desires to join. Also, if anyone is interested in acting in little theater work, he or she will be welcomed to the group, Stone said.

In an addition to actors and actresses there always are openings for stage hands, electricians, ushers, and the many other jobs connected with little theater work.

Discuss Skeet, Gun Club

Some interest has been shown in organizing a Skeet and Gun Club in the Portsmouth Area.

A meeting will be held on Wednesday, October 3, at 8 p. m. in the YMCA, 1236 Gallia Street, Portsmouth.

Employees interested in this activity should plan to attend the meeting.

Classifieds

All ads submitted to the Clan office must be typed, or printed, contain the employee's badge and department numbers, his home telephone number or address, and signed in ink. Deadline is last day of the month.

Invitations Sent To 175 Men, Women; Edmund To Speak

Goodyear Atomic's champion letes will be honored at a banquet next month.

The company will fete the champions at a banquet to be held Monday, October 1, at the Lake White Club. Dinner will be served at 6:30 p. m.

"This is the company's way," R. F. Jones, supervisor of recreation, said, "of honoring the men and women who are the champions of their respective sports."

Invitations have been extended to 175 employees to attend this Second Annual Banquet of Champions. Athletes participating in bowling, softball, touch football, basketball, and golf will be honored.

Trophies

Individual trophies will be presented to the champions by members of the Operating Committee or their representatives.

Jones, who will act as master of ceremonies, said the guest speaker will be W. H. "Bid" Edmund, director of recreation for The Goodyear Tire & Rubber Company. L. E. Fuller, superintendent, personnel services, will introduce the speaker.

A film of the 1956 New Year's Day Sugar Bowl football game between the University of Pittsburgh and Georgia Tech will be shown.

F. D. NOLAND, Department 812, has entered this large-mouth bass in Goodyear Atomic's fishing contest. He caught it in a gravel pit lake southwest of Waverly.

Marriage is a splendid institution. It teaches a man thrift, helpfulness and a host of other virtues he wouldn't need if he had stayed single.
