THE BEST IS YET TO COME

VOLUME V

THE WINGFOOT CLAN

NUMBER 21

Review —OF— Labor Relations

The following additional Stewards have been certified by Local 10-689, OCAW.

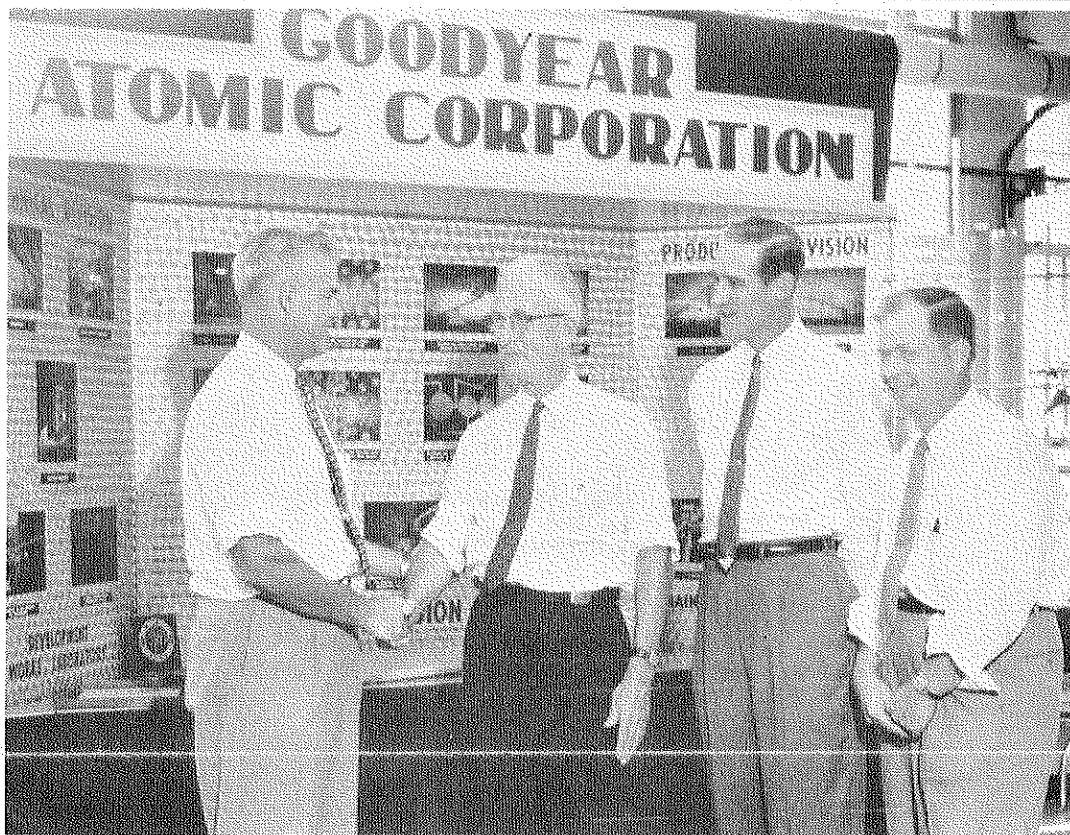

D. W. Frame, department 823, "A" Shift Chemical Operations and Development Operations, Alternate Steward.

R. E. Higley, department 823, "C" Shift Chemical Operations and Development Operations, Alternate Steward.

R. L. Jamison, department 825, "D" Shift Chemical Operations and Development Operations, Steward.

Seven cases will be heard by Arbitrator Frank R. Uible on August 7 and 8. Mr. Uible is a practicing attorney from Cleveland, Ohio.

Seven additional cases will be heard by Arbitrator Robert E. Mathews. No specific dates have been set for these hearings. Mr. Mathews is a professor at the Ohio State Law School.

R. DeYOUNG, executive vice president, GT&R, presents forty-five year service pin to H. H. Kenny, manager finance division. Belden Shearer, assistant comptroller, GT&R, third from left, presented Mr. Kenny with a

sheaf of congratulatory letters written by a host of friends throughout Goodyear. D. H. Francis, general manager, introduced the guests to the members of Mr. Kenny's division who gathered in honor of the occasion.

H.H. KENNY RECEIVES 45-YEAR PIN; JOINS SELECT GROUP OF 71

A man who embarked upon a career with Goodyear in 1913 received his forty-five year pin on July 28 and thereby became a member of a highly select group of employees. The pin, emblematic of long and continuous service, is held by only seventy-one active employees of world wide Goodyear which encompasses over 100,000 persons.

The statistical breakdown of employees with forty-five or more years of service who are still actually employed by the company is as follows: Akron, Ohio, 48; Goodyear Aircraft, 1; Domestic Plants, including Goodyear Atomic Corporation, 10; Foreign plants, 12.

H. H. Kenny, manager, finance division, was presented his pin by Russ DeYoung, executive vice-president, Goodyear Tire and Rubber Company. The presentation was made at a luncheon get-together attended by GAT's operating committee and fellow co-workers of the finance division. Belden Shearer, assistant comptroller, GT&R Co., presented Mr. Kenny with a folder of congratulatory letters written by friends throughout the company.

Kenny began his work at Goodyear in a clerical capacity. After working in the materials, crude rubber, cashier's, tax and insurance, sales accounting and general accounting departments, he was promoted in 1924 to manager, accounts payable department, a position which he held for several years. His responsibilities in this position included the supervision of a staff of 85 employees who prepared all invoices covering Goodyear's domestic liabilities for rubber, fabric, chemicals and other purchases.

In 1930, he became assistant manager, sales accounting and in 1935, superintendent, general accounting.

In 1942, he was promoted to Works Accountant for the government owned synthetic rubber plant in Akron.

In 1943, when Goodyear was authorized by the government to construct and operate synthetic rubber plants at Houston and Los Angeles, he was promoted to the position of Works Accountant for the Goodyear Synthetic Rubber Corporation. This organization acted as an agent for the Reconstruction Finance Corporation for the operation of the two plants.

In 1951 he became Works Auditor. The Works Accountants at Akron. (Continued on page 3)

SAFETY AWARDS

The safety award items which will be available to employees in recognition of one and one-half million manhours worked without a lost-time accident are as follows:

1. Regular Zippo cigarette lighter ladies' & men's (Note: If lighters not available will get leather billfolds for men and women).
2. Ekco 5-piece barbecue cutlery set (turner, frank spear, spoon, fork, rack).
3. Duratone playing card volumes (2 decks plastic coated cards in spring steel imitation leather bound volumes).
4. Dazey No. 66-R super senior can opener.
5. Thermometer (inside and outside).
6. Flashlight.

All employees who were employed during the period covered by the award, February 12, 1958, through June 12, 1958 or who worked part of the period and were then laid off, are eligible to receive one of the awards.

The Safety Award Committee was made up of the following representatives: J. R. Arndt, Janet Forsyth, A. L. Williamson, A. H. Clary, F. E. Pickens, S. D. Schneider, J. H. Beech, J. D. Atkinson, W. W. Hyland, J. T. Rhea, D. E. Schumacher, and C. L. Stewart, chairman.

The committee selected the six items listed above from a proposed list of 25 articles.

Working Dependent Child May Be Income Tax Exempt

Most parents will not lose the \$600 exemption they may claim on their Federal income tax returns for each dependent child spending the summer vacation at a part-time job, according to the Office of Internal Revenue, Columbus District.

Children who will still be under 19 years of age at the end of the year, and children who are full-time students, regardless of age, come under this special exemption rule of the Federal income tax law.

The Internal Revenue office stated that parents who contribute more than half the support of a child in one of these categories may claim a dependency exemption regardless of the amount earned by the child.

Here's a word for working children. They are entitled to a \$600 personal exemption and may be due a refund of part or all the Federal income tax withheld from their wages. They will have to file an income tax return, claiming refund of any amount withheld in excess of the actual tax liability.

Any questions concerning individual cases can be answered at any local Internal Revenue office.

Vacation Voyage

Ramey, Hoskins, mechanical development department, and his wife, Janice, leave Sunday, August 10, on an eight day motor boat trip on the Ohio and Kentucky Rivers. Ramey built the boat himself. It is a 14-foot craft powered with an outboard motor.

The round trip — Sciotoville to Carrlton, Kentucky on the Ohio River and then Carrlton to Beattyville on the Kentucky River — is estimated to be 900 miles. Beattyville is at the head of the Kentucky River.

The Hoskins plan to camp out enroute. The trip has been in the planning stage for some time. The Corps of Engineers was contacted for a map of the Kentucky River and arrangements have been made for fueling stations and campsites.

Mrs. Hospins' uncle, Sedley Stewart, superintendent of schools for Lee County, Kentucky will be their host at Beattyville.

ELECTED VICE COMMANDER

Alex J. Blair, World War II veteran, Jackson, Ohio, was elected second vice commander at the 40th Annual Ohio Department Conventions of the American Legion and affiliated organizations. He is in the instrument maintenance department.

Fleshman Is August Safety Slogan Contest Winner

The committee which selects the safety slogan contest winners has named W. S. Fleshman, process laboratory department, as winner of the first and second place. Mr. Fleshman presented the following slogans:

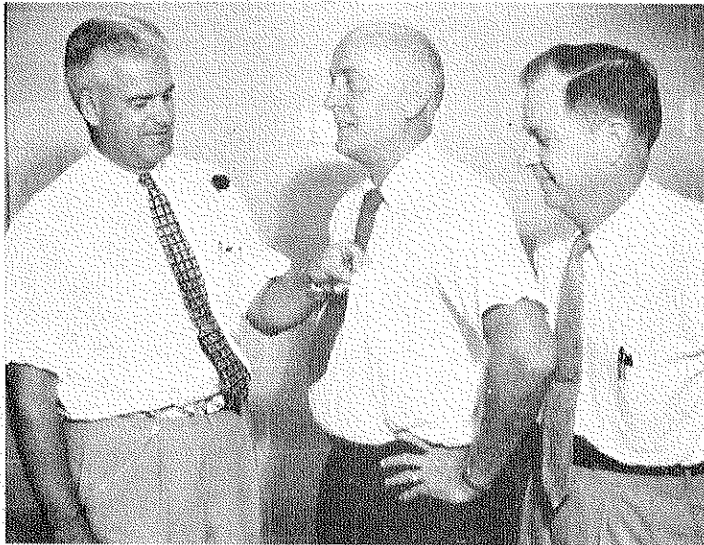

"Use Safe Practices —
Not Short Cuts"

"Keep Every Job Safe
With Planning"

The winning employee will receive two \$10 cash awards.

It should be carefully noted that the slogans are submitted to the committee without the name of the contest participant. Each slogan is identified by number only. This is done, of course, to help the committee make decisions on as completely an unbiased basis as possible.

A total of 72 slogans was submitted during the period of June 22 through July 21. The contest is open to all employees of the Goodyear Atomic Corporation. All employees are urged to participate in the safety slogan contest and to submit slogans for use on the plantsite safety bulletin board.

RUSS DeYOUNG, executive vice president, The Goodyear Tire and Rubber Company, left, presents G. H. Reynolds, manager, production division, with his thirty year service pin as D. H. Francis, general manager, Goodyear Atomic Corporation, looks on.

G. H. Reynolds Honored By Colleagues

Thirty years of continuous service by G. H. Reynolds were recognized last week.

Reynolds, manager, production division and deputy general manager, was presented his 30-year service pin by Russ DeYoung, executive vice president, Goodyear Tire and Rubber Company.

"Bud", as he likes to be called, began his career with Goodyear July 30, 1928. His Goodyear experiences have taken him around the world and have included many varied assignments.

He joined Goodyear immediately upon his graduation from the Massachusetts Institute of Technology and was assigned as a foreman in the tire section. In October 1936 he became division superintendent, tires and tubes, Goodyear Australia. From October 1941 to March 1944 he was general foreman, Goodyear Aircraft Corporation, and concerned with the production of fighter planes. In March 1944 he was promoted to manager, plant 5, Goodyear Tire and Rubber Company, Akron. He remained as manager, plant 5, until July 1947. He was returned to Goodyear Aircraft Corporation in July 1947 as manager, vinyl plastics. He held this position until his assignment to Goodyear Atomic Corporation in November 1952.

Reynolds is a resident of Waverly where he has been very active in all phases of community life. He is a member of the Advisory Board, Pike County YMCA; past president and currently a member of the Pike County United Fund Board. He is a member of the Pike County Hospital Board; member of the Waverly Service Club; and the Mayor's Advisory Committee, Waverly. He has been active in the Lake White Little Theater. He serves as choir director, St. Mary's Church, Waverly. He was a member of the chorus, HMS Pinafore. He also is a member of the Portsmouth Lodge of Elks and the Chillicothe Country Club.

Mr. and Mrs. Reynolds reside at Lake White. They have one daughter and two sons — Mrs. Barbara Schultz of Akron, Ohio, Robert of Schenectady, New York, and Richard, a student at Miami University, Oxford, Ohio, a member of GAT's summer squadron.

When all think alike, no one thinks very much.

Employees who will receive five year pins between August 1, and August 20, are as follows:

- | | |
|-------------------|-----------------|
| W. O. Knauft | J. A. Durant |

GAT EMPLOYEES ARE ELECTED OFFICIALS OF PIKETON LIONS

Four Goodyear Atomic employees have been elected to office in the Piketon Lions Club for the coming year.

M. W. Hartle, electrical maintenance department, is the new president; A. L. Williamson, industrial relations division staff, third vice president; C. Parrish, electrical maintenance department, secretary; and W. W. Stump, engineering costs and property records department, is the lion tamer. E. Hedden, of the Ohio Valley Electric Corporation, was elected first vice president.

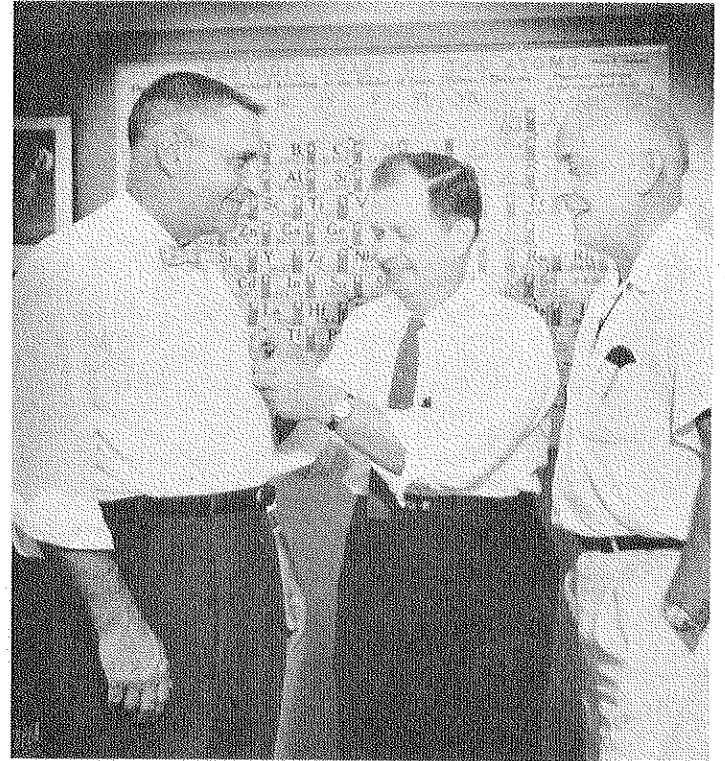

A BIOLOGIST AT OAK RIDGE NATIONAL LABORATORY studies effects of radiation on white corpuscles of blood sample from a mouse which has been irradiated. Oak Ridge National Laboratory, operated for the U. S. Atomic Energy Commission by Union Carbide Nuclear Company, is one of the world's largest nuclear research centers.

Your Work At GAT Helps Make This Possible

This experiment is one of many conducted at this laboratory and other research centers throughout the country which are designed to measure the effects of radiation on the circulatory system.

Your work at GAT helps make possible experiments such as the one above.

D. H. FRANCIS, general manager, center, presents Roy Engler with his twenty-five year service pin as G. H. Reynolds, manager production division, watches.

Roy Engler Receives Twenty-Five Year Pin

A quarter of a century with Goodyear was recorded August 1, by Roy Engler. Engler, "D" Shift Superintendent, began his employment with Goodyear at the Goodyear Tire and Rubber Company, Akron, working in the mechanical goods and tire factory. From 1933 to 1942 he worked on varied assignments at Plants 1 and 2.

From 1942 to 1953 he was in the department of interplant relations assigned to various duties. Before being transferred to Goodyear Atomic Corporation in February, 1953, he was section head, domestic plant contracts.

Engler was very active in employee activities at the parent plant. He served six years as head coach in northeastern Ohio Bantam-Weight Football Association, a league composed of eight teams in the northern section of Ohio. His teams of 1946 and 1949 were league and state champions. He participated and coached adult basketball leagues sponsored by GT&R and CYO leagues in Akron.

He is a graduate of the University of Akron with a BA degree. He also has attended West Virginia University and Washington & Jefferson University. He is a member of the GAT Foremen's Club, the GAT Outdoorsman's Club of Jackson, and St. Peters Holy Name Society, Chillicothe.

Mr. and Mrs. Engler reside in Chillicothe. They have one daughter, Beverly Ann, a National Honor Society student at Chillicothe High School.

IMMUNIZATION PROGRAM

Influenza vaccine is again being made available to employees upon request. The vaccine will be available to all employees on all shifts.

Past immunization practice has shown that the vaccine has been effective. To procure additional information concerning the effectiveness of the program all employees will be asked to participate by filling in an IBM card which requests specific information. The IBM cards will be distributed in the Spring of 1959.

USE SAFETY EQUIPMENT

Safety equipment for certain players in various sports is essential. In fact, if you saw them participate without their protective equipment, you would be convinced that something was wrong. Let's take a look.

BASEBALL CATCHERS must have a face mask, chest protector, shin and knee guards.

A GOALIE in hockey is well padded over all parts of the body for protection against a frozen puck which travels, at times, at a rate in excess of 100 miles per hour.

A FOOTBALL PLAYER must wear a helmet, shoulder pads, kidney pads, and padded pants. Recent years have seen the advent of the face guard attached to the helmet. Would you play football without such modern equipment?

POLO PLAYERS wear, at least, a hard helmet; fencers wear a screen face shield and body protector for obvious reasons of safety. Would you let your child participate in any of these sports without proper protective equipment?

Let's put the question this way: Would your family approve of your using a grinding machine and not using safety goggles? Of lifting with your back instead of your legs? Of participating in horseplay?

Does your family want to see you crippled because you don't observe the prescribed safety rules?

It's strictly up to you. Always use the safety equipment that is provided for your protection.

A CITIZEN is a man who wants better roads, better schools, better public offices, and lower taxes.

—John C. Calhoun

BRUSSELS WORLD'S FAIR

Travelers in Europe will find many new things to interest them this summer, but the outstanding attraction for tourists of all lands will be the huge Brussels World's Fair. This is the first World's Fair since World War II.

The Fair, which opened April 17, and runs through October 19, will be an inspiring demonstration of a small country — Belgium — doing things on a tremendous scale. In the planning stage for several years, the exposition will form a complete city of modern buildings and pavilions. Exhibits will be representative of every corner of the world.

Dominating the scene of the exposition is the Fair's symbol, the Atomium, representing the atomic structure of a crystal of metal enlarged 160 billion times. Under it, 50 countries will be represented by their cultural, economic and social achievements. Attractive and imposing buildings will house exhibits from the United States, Russia, Turkey, Canada, Great Britain, the Philippines, France, tiny Monaco and many others.

Other features of the Brussels World's Fair will be the City of Tomorrow; 4,000 Years of Art; the World of 1900; International Hall of Fame; Garden of the Four Seasons; International Science Hall; the Telecommunication Pavilion, with its towering mast, and scores of other international attractions.

TWO GAT MEN TO PRESENT PAPER AT CONFERENCE SHOW

Co-authors of the paper, "Heat Transfer to Boiling Freon in a Vertical Tube," R. G. Murray and H. L. Foltz, have been invited to present their work at the Second National Heat Transfer Conference and Exhibit.

The conference, sponsored by the Heat Transfer Division of the American Institute of Chemical Engineers and the American Society of Mechanical Engineers, Inc., will be held August 17-20 at the Edgewater Beach Hotel, Chicago, Illinois.

R. G. Murray will read the paper.

Blood Center Elects P. F. Bliss

Paul F. Bliss, community relations, was recently appointed Chairman of District Three of the Huntington Regional Blood Center. The Goodyear Atomic Blood Bank is a part of the Huntington Center. District Three comprises Pike, Scioto, Jackson, Gallia, and Meigs Counties in Ohio, and Mason County, West Virginia.

As chairman of District Three, Dr. Bliss becomes a member of the Executive Committee which is the policy setting and governing body of the Center.

IN MEMORIAM

Tony Cravens St. John, 19, died July 17. Mr. St. John was stationed at a Naval Base in Florida.

His step-father, L. F. St. John, is in the plant engineering department.

KENNY

(Continued from page 1)

ron, Houston, and Los Angeles were responsible to him for all hourly and salary payrolls. In addition, factory costs, and liability accounts were maintained on the operations which represented an investment in land, buildings, and equipment of approximately fifty million dollars. The Works Accountants were also responsible to him for the disbursement of millions of dollars of government funds for new construction equipment and the operating materials and supplies required to produce approximately 250 million pounds of rubber annually. Along with these duties Kenny was also responsible for making all contacts with the Washington Office of the Reconstruction Finance Corporation regarding administrative, financial, and accounting matters.

Kenny was assigned to Goodyear Atomic Corporation in 1952 when the Atomic Energy Commission announced that Goodyear had been selected as the operating contractor for the new gaseous diffusion plant. He was one of the original 25 key men picked to head up GAT.

Since residing in Chillicothe Mr. Kenny has been very active in community affairs. He has been a director of the Chillicothe Chamber of Commerce. He served as a director, treasurer, and as chairman of the budget committee for the Chillicothe and Ross County Community Chest. Recently, he was appointed as chairman, finance committee, for the Citizen's Advisory Group to the Chillicothe School Board.

Mr. and Mrs. Kenny live in Brewer Heights, Chillicothe. The Kennys have one son, Richard H. Kenny of Cuyahoga Falls, Ohio, and one daughter, Mrs. Elizabeth K. Kime, of Akron.

Rowe-Wickline

Miss Nancy Rowe and Marvin Dale Wickline were married in the Coalton Methodist Church on June 21, by the Reverend Thomas Adloff. Mrs. Wickline is in the metallurgy department. Mr. Wickline is in the decontamination department.

Weir-Page

Miss Mary Lee Weir and William D. Page were married in the First Lutheran Church, Johnstown, Pennsylvania, on July 11, by the Reverend Walden M. Holl. Mrs. Page is in the metallurgy department. Mr. Page is a student at Pikeville College, Pikeville, Kentucky.

Crabtree-Corvin

Charles H. Crabtree and Elaine Corvin were married in the Oak Hill Methodist Church on July 12, by the Reverend Lawrence Schmitt. Mr. Crabtree is in the central files department.

Mr. and Mrs. John F. Hall, Jr., (records management department), son, John Franklin, III.

Mr. and Mrs. R. L. Schultz, (internal audit department), daughter, Catherine Ann.

Mr. and Mrs. R. B. Boeye, (security department), daughter, Cynthia Jane.

Mr. and Mrs. William G. Wilder, (chemistry department), son, Bradford Lee.

VACATION TIPS

The major traffic hazards in Alaska are dog teams, moose, and long hours of darkness.

Few U. S. Motorists have run into dog teams or moose lately. But darkness certainly is one of their major driving problems, according to the National Safety Council.

Darkness doesn't just mean "pitch blackness." It also includes the "twilight hours" — 4-8 p. m.

Consider these facts:

1. Three times as many motorists and pedestrians lose their lives at night in auto accidents as during the day.

2. Nearly 3 out of 10 auto accidents occur from 4-8 p. m. One out of four fatal auto accidents occurs then, too.

3. In summer months, especially, the succeeding four hours — 8 p. m. to midnight — are almost equally as hazardous as the twilight hours. About 1 out of every 5 auto deaths charged against U. S. motorists occurs then.

Why is darkness such a danger?

For several reasons —

1. Drivers are tired after a hard day. A trip is a pretty tiring ordeal, even when it's not preceded by eight hours of work.

2. Motorists probably are more inclined to doze at the wheel at night. About 1,850 motorists killed in traffic accidents in 1956 were said to have fallen asleep at the wheel. An estimated 270,000 dozing motorists were involved in that year's traffic accidents.

3. It's harder for most motorists to see at night, and some of them just don't seem to realize it. Too, headlights of approaching cars make night driving difficult for many persons.

4. At night it's hard to spot hazards ahead — sudden twists in the road, wandering animals, a motorist tinkering with his stalled auto.

5. Perhaps most dangerous of the night-time hazards are improper headlights overdriving your lights.

Overdriving your lights? That means this: At a speed of 60 m. p. h., it takes at least 366 feet to stop a car. The Uniform Vehicle Code recommends that an auto's bright lights be capable of illuminating an object 350 feet away. Which means if you're driving 60 and see a stalled auto ahead, you probably can't stop before reaching it.

The solution to preventing deaths during darkness?

1. Make sure your car lights are properly adjusted. Clean the lenses before driving.

2. Keep your windshield clean, too. It will help reduce fatigue and eyestrain.

3. Slow down when the sun's down.

4. Dim your lights to approaching cars, even if they don't dim theirs. And dim when following a car.

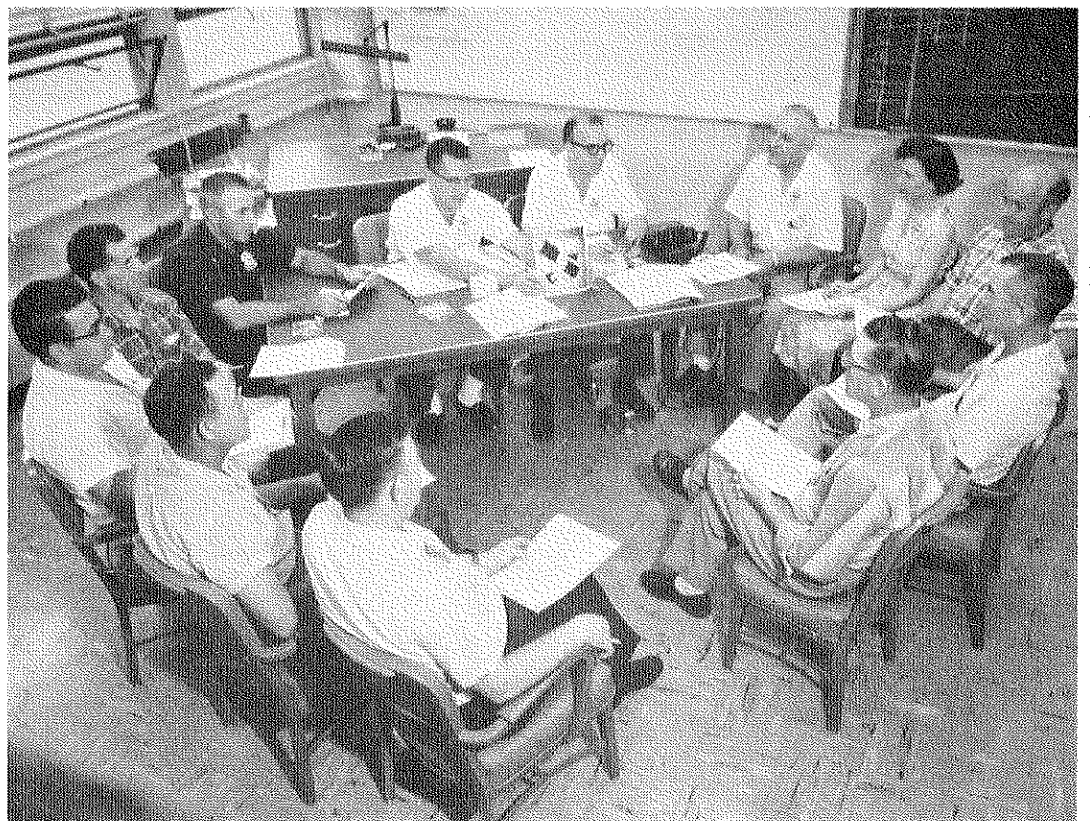

5. Stop periodically on trips for a break.

"It's true that in America we don't have dog teams or moose to contend with," the Council says.

"But it still takes a lot of extra effort by motorists to make night driving safe."

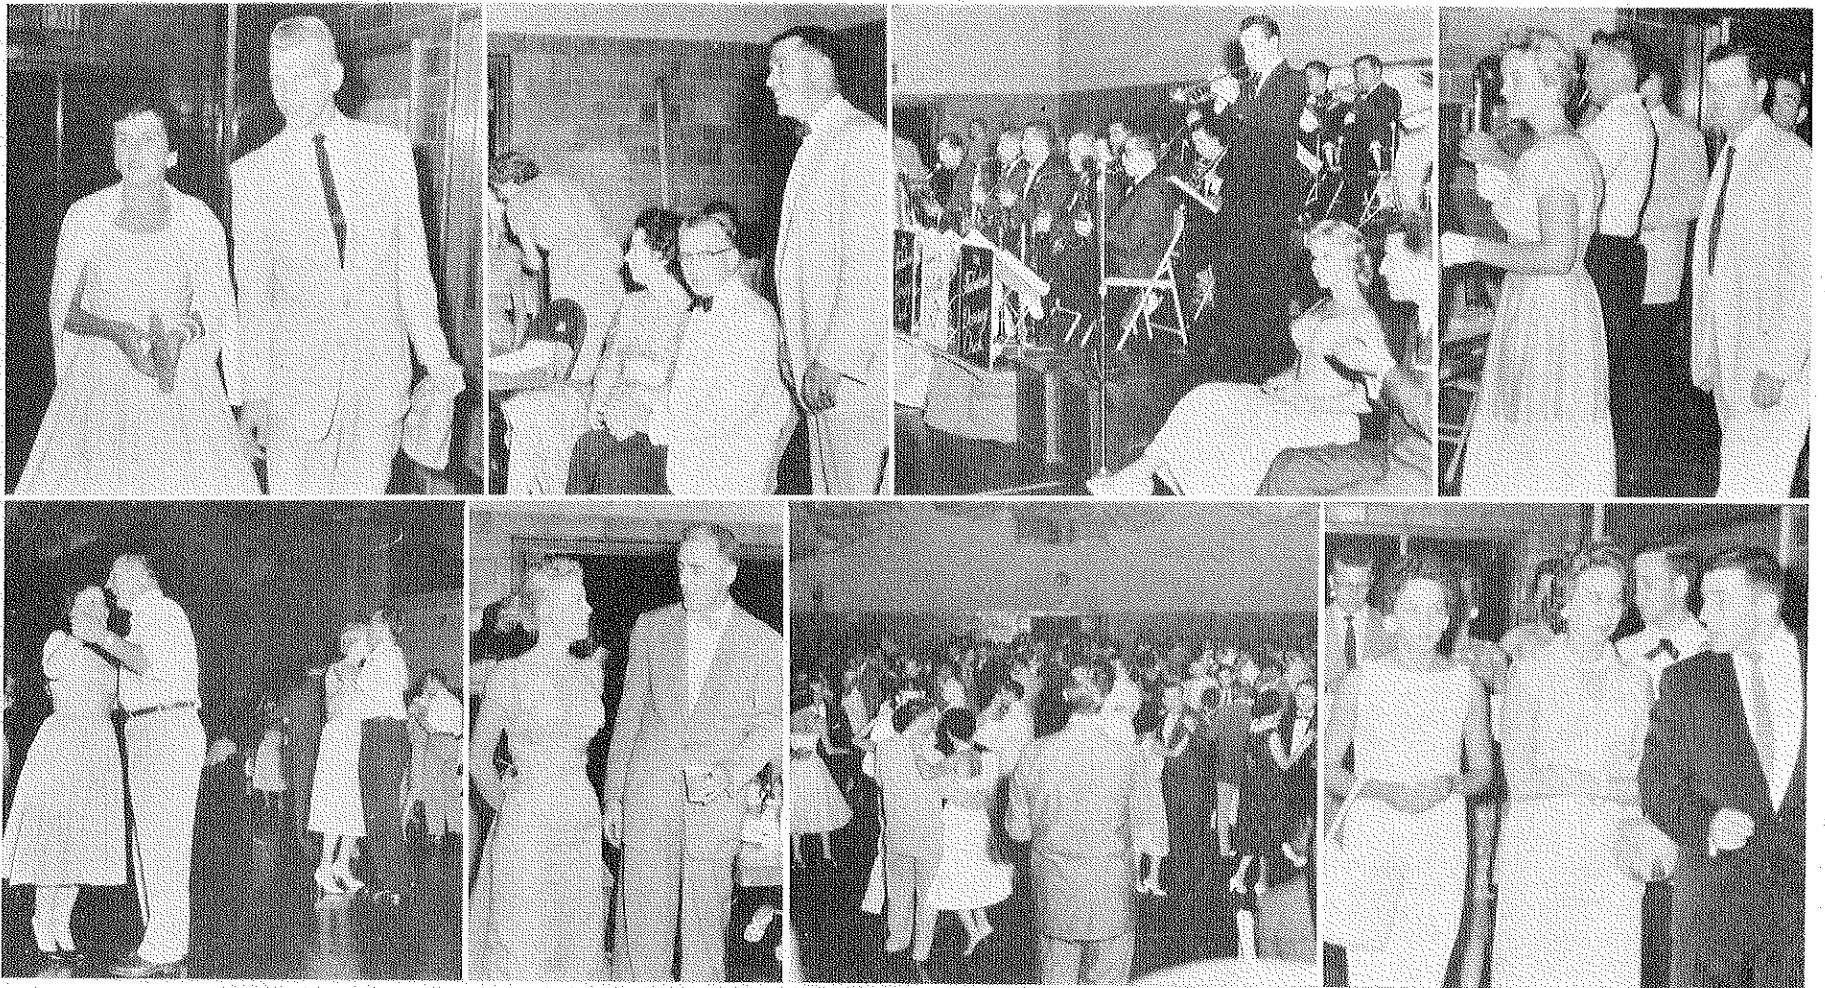

SCOUT PICTURES

GAT Scout pictures are to be used in Scioto County United Fund. Camping pictures also will be used to illustrate the 1959 camping brochure for the Scioto Area Council, B. S. A.

SAFETY AWARDS COMMITTEE. From left to right, Janet Forsyth, representing female employees; A. L. Williamson, 200 division; A. H. Clary, 700 division; F. E. Pickens, 300 division; S. D. Schneider, representing 500 division; J. H. Beech, J. D. Atkins, W. W. Hy-

land, representing Local 10-689, OCAW; J. T. Rhea, representing Local 66, United Plant Guard Workers of America; D. E. Schumacher, 400 division; C. L. Stewart, chairman of the committee, and J. R. Arndt, 800 division.

LARGE ATTENDANCE proves popularity of recreation department's dance program. Left to right, Mr. and Mrs. Gary Price arrived early for their first GAT dance; old friends, Mrs. T. Leary, H. T. Pettie, and Bill Juhn, sit one out; Jimmy Dorsey's orchestra and vocalist, under the direction of Lee Castle, provided music for the occasion; photographing the photographer is always good fun. Bottom, left to right, don't let this picture fool you, the big dance floor was full most of the time; Rhetha Massey talks with T. Leary, formerly of GAT and now with GT&R, Akron; this is the way the dance floor looked most of the time; watching people arrive is part of the fun at a dance.

Classifieds

All Wingfoot Clan ads must be typed or printed, and contain a "blind" address or telephone number to which initial contact can be made. The ad must be signed in ink and carry the employee's department number, badge number, and plant-site telephone number. This service is for employees who have items to buy, sell, or trade. No commercial ads can be accepted.

FOR SALE

German Shepherd Pups — eligible for registration with AKC. Males and females. Born July 6. Phone: Waverly 574-J or inquire at 403 Morningside Drive, Waverly.

Five-room ranch type house. Electric heat, modern conveniences. Large lot, one mile from Sciotoville on Route 335. Write: Box 296, Rig-rish Addition, Route 2, Sciotoville, Ohio.

Slingerland Drum Set. Reasonably priced. Good condition. Phone: Waverly 8133-R.

3½ HP Evinrude Boat Motor — in good condition. Inquire at 403 Fifth Street, Waverly.

Lake White Waterfront Home — three bedrooms, large living room, fireplace, large sun porch and sun deck. Boat dock. Lake White water system. Phone: Waverly 8133-W.

'34 Ford Coupe. Chopped channelled Z'd 5", hydraulic brakes, 3 windows. No rust or dents. Write: Box 46, Sinking Springs, Ohio.

SELL STEEL DRUMS

Goodyear Atomic Corporation will sell a large quantity of steel drums at 2 p. m., August 12, 1958.

Inspections will be permitted from 8:00 a. m. to 2:00 p. m. on August 11 and 12, 1958.

A bid deposit of ten percent is required and the property will be sold "as-is, where-is".

The steel drums are located in Surplus Sales Warehouse No. 4

THE BEGINNING OF BASEBALL

The first match game of baseball was played on June 19, 1846, at Elysian Fields, a summer resort near New York. This game was the beginning of organized baseball. The New York Knickerbockers, a team of gentlemanly amateurs organized for "health, recreation and social enjoyment," played the New York Club, another amateur team. The game was played under Knickerbocker rules — nine men on a side, three outs, a diamond with bases 90 feet apart, and flat bases. When the gentlemanly dust cleared, the Knickerbockers had lost, 23 to 1. The original score sheet, now preserved in the New York Public Library, reveals that the umpire was forced to fine one of the players — Davis by name — six cents for swearing. The first uniforms, as we know them, were adopted by the Cincinnati Red Stockings — knee-length pants and long red stockings. Later, when gloves and catchers' masks came into use, the old timers wept and sang:

*We used no mattress on our hands,
No cage upon our face;
We stood right up and caught the ball
With courage and with grace.*

BOWLING SEASON

The 1958-59 bowling season will soon be upon us. League officers should begin to organize their league now.

C. D. Tabor, president of the men's Monday night league in Jackson is planning to hold the league's organizational meeting on August 18. Bowlers who would like to participate in this league should notify one of the following: C. D. Tabor, works laboratory, F. A. Koehler, special analysis, or J. E. Fichtorn, plant engineering.
