EMPLOYMENT: Hourly - 1021
Salary - 839

December 18, 1974

QUESTIONNAIRE RESULTS: The November 29, 1974 issue of the Newsletter included a questionnaire which was necessary to determine readership response to six questions. Out of a distribution list numbering 619, 342 responses were received. Each question is repeated below.

	Yes	No
1. Do you use the Newsletter's type of information as a reliable or useful source?	91%	9%
2. Do you recommend continuation of only the GAT plant-site news on the front and back pages?	67%	32%
3. Do you read the "Management News - On the National Level" section?	42%	52%
4. Do you read the "Thoughts on Management" section?	40%	54%
5. Do you recommend that the Newsletter be published monthly instead of bi-monthly?	72%	27%
6. Should the Newsletter be continued?	90%	10%

The difference between the percentage of combined Yes and No responses for each question and 100% indicates the lack of response to that question from returned questionnaires.

JUST A REMINDER: All employees should have received notification of the change in procedure concerning admittance to the Plant's limited access area. Effective January 1, 1975, employees should have their photo identification cards ready for inspection as they enter their normal portal. Your cooperation and support will make this necessary change a part of your daily routine.

MERRY CHRISTMAS AND HAPPY NEW YEAR!!

WHO'S WHO IN MANAGEMENT

DAVID E. BOYD is a senior physicist in D-522, Measurements Technology, and reports to J. G. HENRY, Supervisor, Measurements Technology. He is responsible for the operation of the electron microprobe, electron microscope, and vacuum deposition equipment in the X-710 Laboratory. The primary applications of his function are in research for the Development Laboratory and assistance on plant projects such as failure analysis. In addition, he is a member of GAT's Plant Quality Assurance Committee.

Mr. Boyd graduated from Marietta High School in 1960, and from Marietta College with a B.S. in Physics in 1964. Upon graduation from college, he became a member of the Technical Squadron and transferred to D-523 as a technical man in February 1965. He was named a staff technical man three years later, promoted to technical man, sr., in June 1973, and in July 1974, he assumed his current duties.

David, his wife, Dana, and their two children, Mark (8) and Ellen (6), live at 130 Columbia Drive in Waverly. The Boyds are members of the Norwood Methodist Church in Marietta, Ohio. He is a member of the Microbeam Analysis Society of America, Instrument Society of America, and is the editor of the latter organization's local chapter newsletter. His hobbies include bicycling and photography.
